## Professional Experience

**Nashville Software School | Software Developer**

**FEB 2020 - AUG 2020**

Intensive full-time 6 month software development bootcamp focusing on full-stack development fundamentals, design patterns, and agile development.

- Developed full-stack applications using HTML, CSS, JavaScript, React, C#, and .NET framework
- Constructed CRUD functional applications that utilize authentication through Firebase
- Communicated with teams remotely and in person to complete group sprints
- Demonstrated use of source code version control with Git / GitHub
- Designed applications through white-boarding dependencies, drawing wireframes, and building ERDs

**Mastering SQL For Developers**

**SEPT 2020**

- Professional development course from NSS for applying advanced SQL techniques using PostgreSQL
- Managed a car dealership database with SQL subqueries, stored procedures, transactions, and indexes

**Dot FM Group | Digital Marketing Associate**

**DEC 2017 - FEB 2019**

- Drafted and proposed digital marketing strategies to clients
- Worked in collaboration with manager to develop marketing content for Robert Schuller Ministries, Honey Do Service, Tan 2000, ALuxuryLimo, and Red Rooster Bakery
- Ran 2-4 Facebook Ad campaigns per client and updated content based on interaction
- Produced 20 episodes of Sunday at Sunnybrook on YouToo America and 10 episodes of World Changers with Jamie Osborne on BizTV
- Created 5-10 images and 2-3 videos per week for social media posts with Adobe Suite software

## Projects

**Pets Please | React**

[github.com/JaysonRice/pets-please](https://github.com/JaysonRice/pets-please)

Pets Please is a single page application where users upload pictures of pets to share on a social platform.

- Users are able to follow other users to tailor their main feed
- Customize the experience by following interesting pet photographers and filtering by animal type
- Built with React using JSON server, with full CRUD functionality to store user and pet information
- Photos stored using Cloudinary's image services

**Frame Advance | C# | React**

[github.com/JaysonRice/frameAdvance](https://github.com/JaysonRice/frameAdvance)

Frame Advance is an application created for competitive people who want to review footage of past games in order to improve. Users will then have a database of notes with video reference to succeed in the future.

- Users can make a post with a YouTube link, create timestamps, and leave notes about what happened
- Users can find other players' reviews to learn from more advanced players
- Built using C#, ASP.NET Core, Entity Framework Core, SQL Server, React, and styled with Reactstrap

## Skills

**Web Technologies:** Javascript, React, HTML5, CSS, C#, ASP.NET, .NET Framework, Entity Framework

**Database and ORM:** SQL Server, PostgreSQL, dbDiagram

**Design:** Adobe Photoshop, Adobe Illustrator, Bootstrap, Semantic UI

**Development:** Git, GitHub, Agile / Scrum, sketchboard.io

## Education

**Nashville Software School**

Certificate, Software Development

**Middle Tennessee State University**

Bachelor of Science, Digital Media
